

# ECOVAPOR ZERO<sub>2</sub>

*Sell More,  
Flare Less.*

## Capture 100% of the Production Stream

**Capture 100%**  
of the production stream.

**Reduce** harmful emissions.

**Eliminate** flares  
and combustors.

Ultra-**Reliable.**

Improved **Safety.**

The Zer02 solution solves emission and gas capture constraints by removing entrained oxygen from the production stream.

- Avoid shut-ins of natural gas sales lines
  - Over 2.5 million hours of uptime
- Over 70 installations in all major basins
  - No moving parts
  - Simple, reliable and effective

# ZerO<sub>2</sub> Value

## Compelling Economics

When compared to using a VRT and/or combustors, the ZerO<sub>2</sub> unit has compelling economics through additional high Btu gas volumes captured and sold.

## Reduced Emissions

By not having to combust flash gas on site, the ZerO<sub>2</sub> system can drop emissions by hundreds of tons per year, allowing operators to easily meet regulatory requirements.

## Ultra-Reliable

With installations in every major US basin, field-wide uptime exceeds 99.8%. ZerO<sub>2</sub> units are engineered smart and built tough.

## Improved Safety

ZerO<sub>2</sub> allows tank battery pressure to be directly and actively managed to a pre-determined pressure setpoint with a VRU. A passive solution, combustors require tank batteries to pressure up in order to push gas to the flare tips.

## Avoid Unexpected Shut-Ins

The ZerO<sub>2</sub> system helps the operator keep high pipeline integrity by preventing corrosion, minimizes site venting and leaks, and ensures gas quality preventing shut-ins.
